

FE Digital Student

Learners' expectations and experiences of learning in a digital environment - 15 January 2015, The Studio, Birmingham.

Reflections

<p>What are the main challenges facing your college/provider in meeting the needs of different digital learners?</p>	
<p>What are the priority actions for you/your service to meet these challenges?</p>	
<p>How might you use the tools for engaging learners in conversations about their learning with technology?</p>	

What would you most like Jisc/the sector bodies to do after today?

What other reflections do you have on the day?
